FUNCTIONAL ASSESSMENT

Questions & Answers

What is a Functional Assessment?

- A Functional Assessment is a three-part assessment which takes approximately an hour to complete. The three parts are Information, Assessment and Services summary.

Why does a Functional Assessment need to be done?

- All children and adults with a developmental disability who are receiving services and new persons determined I/DD eligible are required to have a Functional Assessment to determine waiver eligibility for HCBS funding.
- **What are the questions about?**
- The Information and Services section is for recording information such as name, address, and a list of services being provided. The assessment section reflects the necessary supports in areas such as medical, behavioral, motor, self-care, and cognitive.

Who should attend?

- The individual for whom the Functional Assessment is being completed must be present and anyone who is in the person's circle of support is encouraged to participate. This includes parents, guardians, teachers, siblings, paraprofessionals and any staff members that work with the person. The individual has the option to leave during the assessment should he/she become uncomfortable with the questions being asked.

Where are meetings held?

- The Functional Assessment can be completed at the person's home, school, CDDO office or other preferred setting.

Why do my answers matter?

- It is important that all questions are answered accurately during the screening for the person to receive the appropriate supports.

What happens next?

- The information is submitted electronically to the State of Kansas. When HCBS Waiver eligibility has been determined, a tier level of 1-5 is assigned based on the cumulative score.
